Private Music Lessons

Piano ~ Voice ~ Guitar

At the Academy, we believe that private music study is best begun at age six (6), when the student has begun reading words, since note reading is an important part of beginning music study. We also expect that students will have an instrument in the home to facilitate daily practice. A keyboard can function as a short-term substitute for a piano in the home, but the finger touch is very different and many keyboards do not have the full number of keys as on a piano.

If you are interested in private music study, please call the office and we will try to match your schedule and needs with an available teacher. Our teachers are here on different days and have limited openings.
